

# TOP 10 REASONS TO CHOOSE CHRISTIE ALL-IN-ONE RGB PURE LASER PROJECTION

What makes Christie® all-in-one RGB pure laser projectors ready to solve customer challenges and help create unforgettable visual experiences? Read on!

[christiedigital.com/chooseRGB](http://christiedigital.com/chooseRGB)

**CHRISTIE®**

1

**Color that takes their breath away**

Deliver the immersive experiences you can't get at home with an expanded color gamut that displays more than twice the color of Rec. 709 projectors.

2

**Content that looks as good as it did on day-one**

Our all-in-one RGB pure laser projectors are factory-calibrated with proprietary LiteLOC™ technology to maintain color and brightness over time, even in higher ambient temperatures and humidity.

3

**Installation versatility**

Operation in any orientation—so you can install your projectors exactly where they need to be.

4

**No external chillers. No heavyweights.**

We integrated it all into a single chassis. Let's call out one superstar: our new 25,000-lumen M 4K25 RGB has an incredible, market-leading form factor of just 92lbs (41.7kg). That's a lot of light from one small box!

5

**Smarter engineering that makes your life easier**

New, forward-thinking TruLife+™ electronics eliminate the hassle of removable option cards. We built-in all the connectivity you need at no extra cost, including Terra® SDVoE inputs. And you'll never need a lift or ladder to adjust your convergence with our new electronic color convergence feature—just use the remote control!

6

**Shhh! Quiet projectors that don't distract the audience**

As low as 46dBA at full brightness—think 'quiet library sounds'.

7

**Energy efficiency and global voltage compatibility**

All our RGB pure laser projectors operate on single-phase 200-240 VAC. The M 4K25 RGB also operates at 100-120 VAC at half-brightness.

8

**The best warping and blending software in the industry**

We built Christie Twist™ right in.

9

**Lens swapping and cost-savings**

Use your legacy Christie M, J, and Crimson Series lenses with the new M 4K25 RGB. And Griffin® Series and D4K40-RGB projectors are compatible with all Christie native 4K lenses.

10

**Seamless integration with all our software tools and processing solutions**

- › Conductor projector control software.
- › Mystique™ automated warping and blending.
- › Pandoras Box® media servers and players.
- › Spyder image processors.
- › Terra SDVoE switchers and AV distribution solutions.

Put them all to work with Christie RGB pure laser projectors—the possibilities are limitless!
